Introducing first of its kind concrete mixer in India with exclusive traits like

'IN-BUILT WEIGHING' & 'WATER MEASURING' system... 10/7 Concrete Mixer

GEN-X

Universal is the Indian leader and the largest exporter of the precisely engineered 200 Ltrs. concrete mixer series. These equipments are apt for low and medium concrete needs. These concrete mixers are extremely fuel efficient and use 25% less fuel than conventional machines. This is the economical range of concrete mixers having capacities ranging from 3 Cu. Ft. to 10 Cu. Ft. Equipped with heavy-duty mixing drum and loading hopper, these machines offer a few customization options. They are ideal for first stage constructions. The welding of these machines is done using robotic technology which offers great precision and eventually better concrete results. A few variants come with an in-built digital weighing system. All the machines in the series are easy to operate and can be operated even by an unskilled labourer. These concrete machines are Universal's professionally engineered offerings and are best suited for small and medium sized real estate developments.
